Products used

E-Line NEXT LED modular continuous line

Still in the portfolio for the refurbishment and expansion of existing systems: the E-Line Fix continuous line system with trunking that has been tried and tested for many years. This ensures continuity and investment security for our customers and E-Line users - and is what the TRILUX after-sales promise stands for.

ConStela

Finea H LED suspended luminaire

Holistic solutions instead of patchwork: thanks to versatility in photometrics and installation type, even extensive projects can be realised with a single luminaire range. This creates an attractive, harmonious overall impression.
