Faciella

Highlighting objects, surfaces and buildings – with Faciella LED the path to perfect light was never as simple. Completely different lighting tasks can be solved with a uniform design. The high-performance and energy-efficient projector is available in several construction sizes and with various luminous flux packages and beam angles for flexible use. The manually adjustable inclination angle simplifies precise targeting of the projector.

Solegra LED surface-mounted luminaire

Solegra LED floats below the ceiling like a large sun. With its uniform, glare-free light and modern, purist design this series of round luminaires lends any room a special look, and is ideal for e.g. creative zones, VDU workstations and prestigious sales spaces.

So-Tube D/H LED suspended luminaire

The perfect lighting solution for the industrial architectures of yesteryear that are being converted into attractive workplaces with office lofts and co-working spaces. The distinctive tubular design blends harmoniously with rough industrial environments, adding a modern and attractive atmosphere through the interplay of light and form. Flexibly configurable, So-Tube LED makes everything possible, whether as a continuous line or as an eye-catching, iconic light sculpture.
