Products used

Skeo Q

The Skeo Q LED family includes square wall and ceiling luminaires, spotlights and bollard luminaires. During daylight the purist, modern shape blends harmoniously into its surroundings and sets attractive accents. At night the flexible family of luminaires displays paths and facades using high quality, energy-efficient light adapted perfectly to the framework conditions.

Lumantix P

The Lumantix LED series combines an attractive design with innovative lighting technology. Its Multi-Lens Technology (MLTIQ) always ensures optimally illuminated streets, plazas, paths and areas around buildings. The Smart Lighting Ready (SLR) version enables light management to be integrated.

Lunexo H LED suspended luminaire

The Lunexo LED, together with the LiveLink light management system, offers extensive control options (e.g. daylight control and presence detection), achieving maximum lighting comfort and a reduction in operating costs.

Skeo Q-B LED bollard

With the diverse Skeo Q LED range of luminaires the complete sector of light around the building can be carried out with a uniform design – ranging from facades to paths and entrances. The luminaires feature not only a linear design but also excellent lighting technology.
