Quira ceiling cut-out Ø130, Ø155

Quira LED – the powerful recessed luminaire that scores with two recessing sizes. Quira LED can be swivelled in up to 15° while remaining flush with the ceiling. For vertical illumination, it can be swivelled out up to 70°. Available with standard white light colours and an Active LED module. This enables the precise adjustment of the light colour regarding intensity and colour temperature. There is a choice of three special light colours for the fresh goods area. Maximum power is selectable with lumen packages from 2,000 to 5,000 lm, while five different 3-D faceted reflectors provide pinpoint illumination. With Quira LED, smart light management can be implemented with a control line or wirelessly for low-installation modernisation. Quira LED is a product by our retail specialist Oktalite. With leading-technology products and a consistent focus on smart, networking-capable solutions, TRILUX is bringing the future of lighting to almost every area of application.

LiveLink WiFi/LAN

Optimum, individually adapted light with minimum effort – now achieved thanks to the intuitive and reliable control of all light points. The simply installed, intelligent LiveLink light management system developed by TRILUX together with the sensor manufacturer STEINEL enables the highly simple planning and operation of even complex lighting system controls. The system features especially simple commissioning, deemed one of the major challenges with control systems – LiveLink intuitively guides planners and installers through pre-configured rooms with typical applications. Commissioning and operation is implemented using a graphical user interface on mobile iOS or Android end devices. With LiveLink, TRILUX offers simple and intelligent access to the world of light control.
