

## PROJECT: MARIEN REALSCHULE CHAM

### Project information

City: 93413 Cham / Germany

---

## PROJECT DETAILS

### Project images

### **8841 LS**

Constructional architecture does not stop with the outer facade but continues with the building surroundings. During daytime the new TRILUX LED bollard luminaire 8841 emphasises the design of the outdoor area, while during twilight and in the evening its excellent illumination guides the way. Whether with asymmetric or rotationally symmetric wide light distribution, the LED bollard luminaire guarantees optimal light effects with all luminaire versions. Additional protection from vandalism is provided by the possibility of a supporting column with continuous underground support.

---

### **Arimo Fit LED recessed ceiling luminaire**

Thanks to the wide range of optics, module sizes and mounting methods (lay-in, recessed and surface-mounted solution), all lighting tasks for planar lighting in offices can be solved with the Arimo Fit LED luminaire range.

---

### **Creavo LED recessed ceiling luminaires**

Creavo is the ideal solution for directional light in the office: three optics with ConVision® technology, various module sizes and four mounting methods are available. Typical for the luminaire range: light chambers as an element of design. Light management, emergency light and location-based services can also be implemented via the IoT harbour.

---

### **Solván Flow C LED recessed luminaire**

Everything is possible, from single luminaires as recessed, surface-mounted and suspended versions to continuous lines with integrated emergency light function.

---

### **Sonnos**

Many functions and one world of design: the modularly designed Sonnos LED range of downlights can implement all lighting tasks in a uniform design and quality of light thanks to the wide selection of lighting technologies, optics and surface-mounting options.

---

### **Finea C LED recessed ceiling luminaire**

Holistic solutions instead of patchwork: thanks to versatility in photometrics and installation type, even extensive projects can be realised with a single luminaire range. This creates an attractive, harmonious overall impression.
